

PRODUCT INFORMATION

Salt Sabouraud Dulcitol Broth is utilized for the enrichment of *Candida* species, including *Candida auris*, which is an emerging fungal pathogen. The growth broth is also known as Salt Sabouraud Enrichment Broth or Salt SAB Broth and is compliant with the CDC formulation.

FORMULA* (per Liter):

Casein	5.0g
Peptic Digest of Animal Tissue	5.0g
Dulcitol	20.0g
Sodium Chloride	100.0g

Supplemented with Chloramphenicol and Gentamycin to a final concentration of 50mg/L (each)

* Adjusted and/or supplemented as required to meet performance criteria.

Product is 0.2µm filter sterilized.

SALT SABOURAUD DULCITOL BROTH (SSDB) WITH CHLORAMPHENICOL & GENTAMICIN

Material 5067

PHYSICAL CHARACTERISTICS:

Appearance: Prepared medium is clear to trace hazy and light to medium yellow

pH: 5.4 - 5.8 @25°C

GROWTH RECOVERY:

Test Organisms	Expected Results
<i>Staphylococcus aureus</i> ATCC® 25923	Partial to complete inhibition

STORAGE AND HANDLING INSTRUCTIONS:

Store product tightly sealed at 2-8°C (refrigerated, USP), upon receipt. Do not heat or freeze and minimize exposure to light. Media should be equilibrated to room temperature prior to use - not to exceed 30°C. Product expiry is 183 days (6 months) from the date of manufacture. Reference our *Prepared Media Storage and Handling* document for additional information.
